## INTERNSHIP

### WEB DEVELOPMENT Intern – Techno Hacks – Online

Collaborated in designing and deploying responsive web pages (Login page, Stop watch, Currency converter) using Html, css, js.

## PROJECTS

### • Weather Website – (React JS)

Developed a Weather website using React.js, to fetch the real time weather data via API. It displays a current weather condition, including temperature. In an interactive and user-friendly interface.

### • WhatsApp Clone (UI)-REACT JS

Developed a WhatsApp Clone UI using React.js, focusing on the chat interface, sidebar, and responsive design for an engaging and modern user experience.

### • Note Taking Application- (MERN Stack)

A Note-Taking Application can be built using MERN stack for the frontend, where users can create, edit, and delete notes. The Node.js backend handles requests, while MongoDB stores notes and user data for persistence

### • College Management System – (MERN Stack)

Built a full-stack College Management System with a clear and user-friendly interface. Implemented full CRUD operations for managing students, faculty, and course data. Effectively handled routing for seamless navigation across modules
